## Career Summary

Self-motivated IT graduate with 7 Years of experience as full-stack developer in various areas of web and mobile application; designing and development of both front end and backend. Experience with array of front end and back end languages, responsive frameworks, databases, integrating 3<sup>rd</sup> party platforms and best code practices. Exploring world of deep learning, artificial intelligence.

## Work Experience

- Plan Street Inc., USA (July 2021 – Ongoing)  
**Sr. Software Developer | Team Lead for Software Development Team**  
I worked on main B2B SAAS application for US based NGOs to revamp legacy code into .net REST APIs, designed & developed new CRUD and other business features end to end including databases, application and UI. Worked with team to integrate Power BI visualization tool & Automate via Azure Functions, Logic Apps and Elastic Jobs oversee Azure cloud platform including enhancing CI/CD DevOps pipelines, HIPAA compliance, and enhanced TLS implementation.  
Led engineering team of 6 developers, established automation of internal devops processes reducing customer onboarding time by 92%, Reduced production errors by 96%, Trained 2 junior developers
- Contour Software, R&D Department - Constellation Software, Inc. (Dec 2017 – June 2021)  
**Software Developer | Sr. Software Developer**  
I worked in team to build B2B various systems of engagements, integrated with the core vertical ERPs by collaborating with US based partner companies like Cultura Technologies, Greenstone Systems and Solentra.  
**Agris Sales :** Worked with system architect and team to developed backend APIs, design and developed database. Also worked on mobile front end.  
**Agris Sales Review:** Architect system and developed backend APIs, design and developed database, and Integrated it with a vertical ERP.  
**Agent Health:** I architect this internal system for increasing efficiency of the business workflows. I design, developed and implemented the database, backend APIs and UI.  
**Action List:** Developed backend APIs, design and developed database and collaborate with the front end team in their implementation of the system.  
**Agris Warehouse:** Developed backend APIs and front end of mobile app.  
**Arthur Optimus:** Developed backend .net APIs and integrated with vertical ERP.  
**ESignature:** Worked closely with the architect to implement agent behind firewall to support real-time communication. Collaborated with team on implementation of database, backend APIs, database and integration of 3<sup>rd</sup> Party solutions.  
**MyGrower:** Worked on backend and developed backend APIs and Integrated it with a vertical ERP and 3rd party platforms. I also worked on UI, CI/CD, it's mobile app and on occasions Test Automation.
- Trandts Software House (June 2016 – December 2017) **Software Engineer | R&D Engineer**  
**rte.trandts.com:** Architected, designed and developed prototype of a product with multi-tenant, version aware architecture based platform which provides in-app IDE for rapid app development.  
**JuristIntl.com:** Developed application with marketing site for "Hussain & Alam" Law Firm on an early version of above said platform prototype. I was responsible for implementation and supervision of training team members on usage of platform.
- Trandts Software House (August 2014 – January 2015) **Web Developer**  
**SpecProperty.com:** Developed marketing website for Australia based real estate developer firm, and supervised UI designers.
- Trandts Software House (July 2014) **Intern**  
Worked on different projects under supervision of senior developers.
